

## Solution Architect

Are you a top notch hands on solution architect with 10 to 15 years experience looking for a new gig in a fast growing industry? If so, read on...

Vayan Marketing Group is an interactive marketing and data solutions company with its headquarters in sunny Boca Raton, Florida. We are an “Inc. 5000” company that is a market leader in the interactive and direct marketing industry with an exciting technology platform.

### Job Duties Include:

- Architect and develop core components of Vayan's internal application suite
- Collaborate with the leadership team on determining technology needs of current and future initiatives
- Manage technical development team and database team
- Conduct evaluation of current internal systems and package solutions
- Make recommendations for new tools and technologies and lead full life-cycle development of multiple technical projects
- Ensures all projects are completed on time with proper documentation and within company quality standards
- Remain current on the latest technologies and make recommendations for Vayan technology improvements.

### What We Offer You:

- Friendly team-oriented work environment
- Fun business casual atmosphere (iPods and jeans are allowed)
- Growing entrepreneurial company
- Excellent benefits including health insurance, generous PTO (paid time off) Program, 401(k), short-term disability, long term disability and life insurance
- Opportunity to be a part of new and cutting edge internet advertising industry

### What We Are Looking For:

- Ability to proficiently architect and develop end to end solutions
- Energetic self-starter with an excellent work ethic
- Excellent communication and organizational skills
- Hands-on team leader
- Experience managing teams, projects, milestones, and deadlines.
- Proven track record of successful installations and high quality deliverables
- Experience with designing, developing and enhancing systems for an Internet based company
- Extensive knowledge of technologies, tools, platforms and packages
- 7+ years of Java/J2EE development experience
- 7+ years of SQL development experience (SQL Server, Oracle, or MySQL)
- 5+ year of Stored Procedure development and maintenance
- 2+ years JDBC experience in application development
- 2+ years Web Services, both creating and maintaining
- 5+ years HTML/CSS/XML/JavaScript
- 5+ years IIS, Apache
- 5+ years Linux
- Internet Marketing Industry experience a plus
